

Project / Service Delivery Manager

Competitive salary, Regular Travel Nationwide

If you are looking for a new challenge and are passionate about improving the NHS, this is the role for you. We are looking to recruit a Project Manager to join our Service Transformation Team.

Attain was established from the desire to create an organisation driven by values and an ethical commercial model. Through this fundamental ethos and focus on building our reputation for rigorous and impactful work, Attain has become the largest independent health advisory and delivery organisation in the UK and often cited by staff as 'an inspiring place to work'. Drawn from across the public and private sectors, the team has a mix of clinical and operational NHS expertise, industry and management consulting experience. Through working solely with the NHS and its' partners, the team strive to make a positive contribution to our communities and play a role in the transformation of care services, adding value and bringing insight and energy to the sector which we are both passionate and proud of.

The successful candidate will have experience in establishing and maintaining robust project or programme management arrangements against a range of projects and supporting the development of the redesign and improvement of specific services, specialities, and pathways.

As a service delivery organisation, our staff work in a variety of locations all over England and as such you may need to be flexible with regards to travel and working away from home in response to customer requirements.

Key Responsibilities:

- Establishing and maintaining robust project or programme management arrangements against a range of projects
- Developing and maintaining project management documentation
- Supporting the development and implementation of innovative and integrated new models of care
- Developing and implementing coherent strategies to secure the sustainability of health and wellbeing services
- Redesigning and improving specific services, specialties, and pathways within larger change and transformation programmes
- Engaging with patients, clinicians, carers and wider stakeholders so that they remain central to all decisions
- Managing small scale projects with appropriate controls

Knowledge, Skills and Experience:

- Qualification in PRINCE2, and/or similar methodology
- Experience in managing projects in a healthcare environment
- Ability to adapt project management techniques to customer needs and environment
- Experience of running projects or workstreams within programmes which have delivered change and improvement

- Understanding and evidence of the tangible benefits of the change process
- Evidence of working in and contributing to teams and their delivery objectives.
